

Job roles at Sizewell C

Steel Fixer

The Sizewell project is a great environment for **steel fixers** to learn their craft, working alongside engineering designers, steel erectors and other experts on a flagship UK power station.

What do steel fixers do?

Steel fixers at Sizewell C use steel bars and mesh to strengthen large buildings.¹ Their work is vital on construction sites.

What skills will I need?

Physical fitness
A head for heights
Attention to detail
Manual handling

This role will suit you if...

You can understand technical plans and briefings, and work as part of a team to put them into action.

What are the career prospects?

Gain seniority, supervise other steel fixers, or move into related roles such as welding or scaffolding.

What's great about being a steel fixer

If you're physically fit and active, and love working outside, this could be the perfect role for you.

Your route into a job at Sizewell C

Qualifications:

To start work as a steel fixer:

- You'll need at least a level 2 qualification in English and Maths, such as a GCSE.
- You'll work towards an NVQ Level 2 Steel fixing qualification, which may take the form of an apprenticeship.²

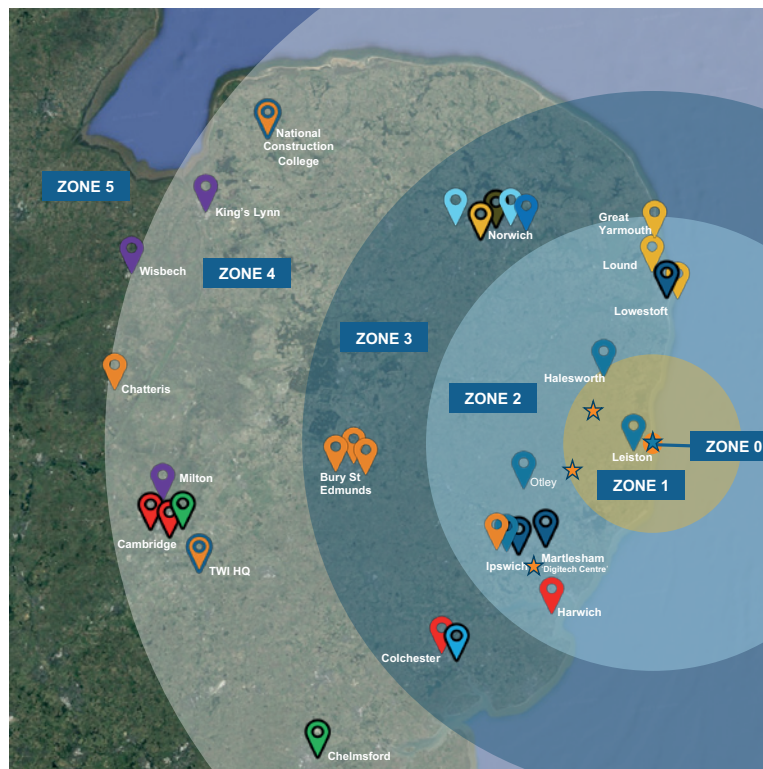

Don't have the qualifications? Don't worry! Sizewell C can help you. We are developing technical centres of excellence in the region and pathways into employment, which will help you get from where you are now, into an exciting new career at Sizewell C.

Most jobs require Maths and English GCSE as a minimum

Find a course near you

Sizewell C has partnered with local colleges and universities, so you can get the qualifications you need on your doorstep:
