

## Job roles at Sizewell C

# Lifting Operative

On major construction projects, lift operations are critical to getting large components into place. As a **lifting operative** it's your job to oversee the work and keep everybody safe.

### What do lifting operatives do?

Lifting operatives plan and carry out the lift of large components (like plant equipment) in a construction project.

### What skills will I need?

**Manual handling  
Attention to detail  
Teamworking  
Problem solving**

### This role will suit you if...

You're great at problem solving, comfortable with having responsibility, and have excellent communication skills under pressure.

### What are the career prospects?

Apply your skills to challenging construction projects worldwide, or move into related roles like an equipment inspector.

### What's great about being a lifting operative?

**This is a key role at Sizewell C, where the experience and skills you gain as a lifting operative could be the foundation for an exciting career in worldwide construction!**
